Pictures of our campsite

Below are somethings to think about:

- 1 There's electricity within each campsite.
 - A Bring a surge protector and 100' sturdy extension cord.
- 2 There's water within each campsite.
 - A. You don't have far to go to get water
 - B. Feel free to bring a water hose.
3. There are grey water holes within each campsite.
 - A. Be prepared to drain the greywater so that food will not go into the holes. Food could possibly stop up the hole and the water could backup into your campsite.
- 4 Beware of ant beds.
 - A. Just like in Athens, Texas, prepare to get rid of ants in your campsite.
- 5 Pooper scoopers.
 - A. Herds of deer were seen running around where we are camping. Prepare to pick up poop out of your campsite.
- 6 Load and unload on the grass.
 - A. The roads are about 10 feet wide going in one direction.
 - B. Have your bus park on the grass during loading or unloading. This will keep the flow of traffic going.
 - C. This will be extremely important on Saturday night. Clubs will be trying to leave in order to catch their flight. If you are park on the road, no one can get by you. Load and unload on the grass.
7. Bring folding chairs.
 - A. Have you pathfinders bring folding chairs to sit in. There will be no seats at the main meeting area.
- 8 No RVs in Southwest Regions Campsite.

Our Local Warning System

Warning Sirens

Campbell County's Warning Sirens are ONLY sounded for a Tornado Warning for the area served by those sirens.

If you hear the siren(s) seek shelter. They only provide a warning and they will NOT sound continuously.

We do NOT sound an All Clear afterwards.

NOAA Weather Radio

One of your best sources of information is the National Weather Service All-Hazards Weather Radio. Watches, Warnings, forecasts and current conditions 24/7/365.

The Gillette Weather Radio is WNG-660 at 162.500 mhz. Our Specific Area Message Encoding (SAME) Code is 556005.

National Weather Service/Internet

We are served by the National Weather Service Forecast Office in Rapid City, SD. Camporee has been designated for Decision Support, so they're providing Campbell County and CamPlex extra monitoring all week and we will have one of their meteorologist's stationed in Gillette during this week.

Rapid City NWS is on the web at:

<http://www.weather.gov/unr/>

Wireless Emergency Alert System

Campbell County has IPAWS authority and can set off the Wireless Emergency Alert system on Smart-Phones.

Our Weather may not be the same as what you're used to!

Typically, if thunderstorms develop they'll move through Gillette between 2:00 and 7:00 p.m.

Just because it's a warm day, don't expect the same at night. You'll probably want a jacket once the Sun goes down.

Local Radio Stations

Campbell County works closely with our local broadcasters who can activate the Emergency Alert System or provide on-air warnings, advisories and updates.

You can find them at:

Summer Weather in Campbell County

Severe Summer Thunderstorms with large hail and damaging wind gusts are less common by early August. Campbell County typically has one thunderstorm a year that produces hail at least one inch in diameter and winds 60 mph or stronger.

Since 1996, the Gillette area has had only four storms produce hail one inch or larger (about one every five years) with the largest the size of softballs (more than four inches in diameter). Strong wind gusts are more common, occurring on average every three years, and the highest measured wind speed was 72 mph.

Wanna Play Catch at over 90 mph?

Hail is dangerous. Seek cover until it passes. Remember, broken glass flying through the air can cut.

For the National Weather Service forecast for Cam-Plex scan this QR

What is "typical" Weather in Gillette?

From August 1st to 15th

"Normal" in Gillette includes:
 High Temperature 87° F
 Low Temperature 58°F
 Daily Precipitation .06"

August Extremes

- High Temperature 106° F in 1949
- Low Temperature 38°F in 1980
- Maximum 24-hour Rainfall 3.26" in 1912
- Largest Hail: Tennis Ball Size (2.5+ inches)
- Strongest Wind Gust: 83 mph

IF THUNDER ROARS...GO INDOORS!!!

If the storm is close enough you can hear thunder, you're close enough to be struck.

Lightning can occur several miles in advance of the "cloud" and our storms develop quickly and often move faster than you might expect.

Being outdoors or in a tent is NOT a good choice for lightning safety.

A substantial building provides the best protection.

Inside a vehicle and not touching metal is slightly better protection than being out in the open.

If someone is struck by lightning, begin immediate First Aid/CPR as needed.

Call 9-1-1 and get help started immediately!

We have the Thorguard Lightning Prediction System

If lightning is expected within the next 10 minutes, during the day-time, it's "air horn" warning will sound three times.

You can go to the Thorguard Website to see it's predictions/status

<http://ccwy.thormobile2.net/>

Weather Terms to Know

A **Severe Thunderstorm** will contain one or more of:

- Wind gusts of 58 mph or greater
- Hail one inch (about the size of a US Quarter) or greater

A **WATCH** means conditions are favorable for hazardous weather to develop. We have the right mix of ingredients!

A **WARNING** means the conditions have come together and severe weather is imminent or already occurring.

Tornado Safety

If you hear the siren or see a tornado, seek shelter!

Winds increase above the ground, so seek shelter in the lowest level of a substantial structure.

Leave travel trailers and vehicles as they are easily tossed around by tornado winds.

If you cannot get to shelter, find a low-lying area away from objects that may become flying debris.

Charging Stations

Conferences should provide their own charging stations within their conference campground headquarters. Bring a quiet running generator and long power strips to provide charging stations for your Pathfinders and staff to charge their cell phones, etc. Have this located at your conference headquarters. Keep in mind those camping around the charging station and use a quiet generator.

False Rumors about Camporee

A. NOT TRUE: There is not enough food at surrounding grocery stores to provide for Camporee attendants.

WHAT IS TRUE: The Camporee has been working with area grocery stores, Walmart Corporate, and local Walmart leadership to make sure needs are met. The June BTP newsletter will have a pre-order Walmart form for food, camping supplies, etc.

B. NOT TRUE: The US Government is checking the legal status of Pathfinders coming to Camporee.

WHAT IS TRUE: This is completely false.

Laundromats

There are no laundry services at the campgrounds. Laundromats are available nearby. Check hours and locations on Google Maps.

TEXAS	Leathercraft	Leather is used throughout the Old and New Testament to share elements of the Gospel. For example, a "tunic made of skin" (code for leather) was the article of clothing God gave to fallen humanity to cover their nakedness(Genesis 3:21). Animal skins (vellum/parchment) were also used for writing the Scriptures and other important official documents like a Last Will and Testament. After Peter had a vision at the housetop of Simon the Tanner (a person who would prepare animal skins) he understood that repentance was for Jew and Gentiles (Acts 11:18). Some scholars find that the little scroll of Revelation 5 resembles a Last Will and Testament (diatheke, Hebrews 9:17), which was written on leather, contains the names of those who will receive the promised inheritance.
